

# **SCHENCK ROTEC CORPORATION**

## **Quality Policy and Objectives.**

**We at SRC provide individually designed products and services for operators of rotating machinery to improve on product quality, operational safety and energy efficiency.**

**In order to maintain our current role as market and innovation leader in the fields of balancing machinery, we dedicate ourselves to the following points:**

- Thoroughly understanding our customers' needs and exceeding their expectations through partnership interactions.**
- Ensuring high quality as the essence of Schenck's existence by continuously improving the effectiveness of our processes, products and services in accordance with our QMS.**
- Contributing profoundly to the global success of SCHENCK by permanently observing and proactively anticipating market developments.**
- Treating our vendors fairly and in partnership arrangements.**
- Create a rewarding and challenging environment of high integrity and ethics.**
- Constitute a positive environment, where we encourage internal improvement suggestions and continuous improvement.**
